

Kendall

Kendall...

For hundreds of years furniture makers and interior designers have prized the hallmark of hardwood flooring, the mighty oak. The Kendall Collection of oak flooring is available in a wide array of colorations or in simply no color at all. The pronounced wood grain patterns of red oak are subdued in a natural finish while the subtler figuring and graining of white oak is enhanced with a complete palette of natural color.

Engineered floors handle seasonal changes with less stress and minimal movement, which means less floor gaps.

The factory applied, finish, has superior abrasion resistant qualities. This advanced technology offers a superior product with cross-ply construction that is stronger, more durable and longer lasting.

We strive for every aspect of our production process to be environmentally friendly. We believe our efforts will ensure the beauty and abundance of one of our most precious resource...our trees.

IMPORTANT INFORMATION ABOUT HARDWOOD FLOORS

Inspect ALL materials carefully BEFORE installation. Wood is a natural product containing natural characteristics such as variations in color, tone and graining. Some variation in color is to be expected in a natural wood floor. It is the customer and installer's responsibility for final inspection prior to installation. The warranty DOES NOT cover materials with visible defects once they are installed.

The manufacturer - retailer will not be responsible for claims arising from flooring that has a greater range of grain / color variation than found in the showroom display samples.
